AlarmWATCH

Data Entry Two-Trip Delay Form

Please fax back to 410-785-1742

(Please use a ball point pen)

Dealer Name	
Dealer ID	**Account Number**

Name of Subscriber	**Date**
Street Address	
City, State And Zip Code	

****We strongly suggest calling our Dealer Services Department before using this feature****

You may hold an event for up to one minute while waiting for another event in order for the central station to take any action on the alarm. If only one of the signals that is married is received by the central station no action will be taken. Both signals must be received within one minute before any action is taken by the central station. If both sigals are received after one minute no action will be taken as this is an automated process. Please see examples below:

First Alarm Being Held			Marry To	Second Alarm Being Held		
Code	Zone	Description		Code	Zone	Description
