

Please detach and enclose this portion with your payment. Acct# _____

I am considering changing to a VoIP phone system. Please contact me to discuss how this will impact my current alarm system.

Name: _____

I prefer to be contacted by phone at the following time and phone number:

Daytime _____ or Evening _____

I prefer to be contacted at my email address: _____

Thank you for letting us know of your interest!

A house fire happens every 83 seconds.

More than 80% of all fatalities due to fire occur in the home.

Most fire deaths occur between 10:00 PM and 5:00 AM.

Of 395,500 house fires annually in the U.S., they have resulted in over 3,000 deaths, 13,000 injuries and \$5.8 billion in property loss.

**Is your security system doing all it can
to protect your family?**

- Are your collectibles or family heirlooms irreplaceable?
- Do you forget to test your smoke detector monthly?
- Do you or your spouse travel often?
- Do you often leave pets home alone?

What fuel burning appliances are in your home?

- furnace, dryer, water heater, oven/stove,
- fireplace

The more you answered yes to these questions, the more your family needs the protection of a monitored life safety system.

When your smoke detector sounds, who will you call?

Professionally-installed, 24 hour monitored detectors can notify your monitoring station, which immediately calls the fire department to help you--**whether you hear the alarm or not.**

Our advanced technology detectors alert you to the first signs of trouble and signal the monitoring station to send help at the earliest moments of a fire emergency.

If you would like to learn more about monitored fire and smoke detection, please complete the attached form above and mail it back with your payment.

We will contact you with more information about this service.
