

Enhancement Changes to Dealer & Subscriber Web Access

February 14,2011

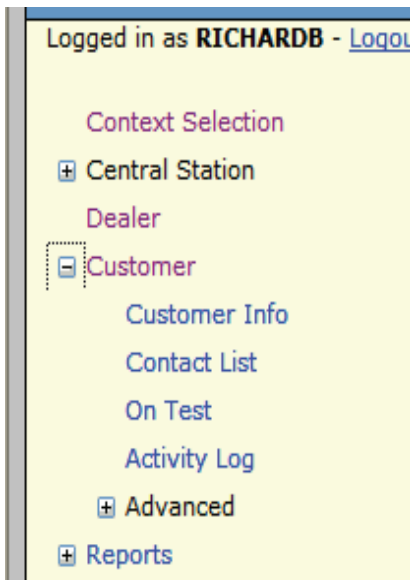

AlarmWATCH will be updating the BoldNet Dealer and Subscriber Web Access on Tuesday February 15, 2011. The changes are mostly for appearance and will not affect how you navigate the web access.

One beneficial change to the web access is when logging in to your Dealer page there is now a **Quick Load Customer Id field** located in the right corner as seen below. This will allow you to immediately go to the customer you want instead of loading the search fields. If you need the search fields, simply click on **Customer** and they will load as normal.

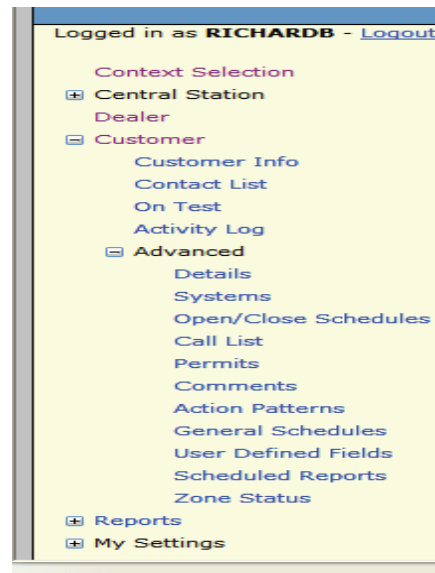

Another minor change is the tabs on the left will now show the four most popular tabs when a customer is loaded, **Customer Info, Contact List, On Test, and Activity Log**. To use the other tabs, simply click on **Advanced** and they will load. Please see example below:

Before Selecting Advanced Tab:

After Selecting Advanced Tab:

As always if you have questions please do not hesitate to contact our [Dealer Services Department](#) at 1-866-500-8808 Ext. 2014.
