

Overstock inventory?

Old product on your shelves?

Items that cannot be returned?

Cash in those wasted dollars.

AlarmWATCH can help you move inventory off your shelves and convert it to monitoring service you need.

The program is simple. Your products are professionally photographed, described, listed on Ebay as a 7-day auction, (hopefully) sold, payment is transacted, product packed and shipped out the door--**for you.**

All sales proceeds (minus commissions and related Ebay/PayPal fees) are then credited to your new or existing AlarmWATCH account, as ready-to-use monitoring certificates/credits.

AlarmWATCH™, an established, UL-certified central monitoring station, offers state-of-the-art monitoring, with all the new technologies and dealer support programs you want and need to maintain your accounts easily and profitably.

Our partnership with Ebay Power Sellers, MDA Resources, means you will be represented by a selling agent with a 99% approval rating and a large established buying audience of security dealers seeking the products you wish to sell.
